SUMMARY

Mid-Level Software Quality Engineer More than 3 years of experience in the IT field, e-government, and e-commerce solutions with a focus on Quality Control and Assurance engineering, Testing of Mobile Applications, and effective use of QA and Testing practice. Familiar with test management, and defect management.

EXPERIENCE

Mid level software quality engineer ii

Quality Engineering & Software Testing

10/2023 Riyadh

- Coordinate with multiple stakeholders, including project managers, developers, business analysts, and clients, throughout the testing lifecycle
- Develop and implement test strategies, test plans, and test cases to ensure comprehensive test coverage
- Plan and manage testing schedules and resource allocation to meet project deadlines
- Ensure the quality and reliability of software products through rigorous testing processes
- Perform functional, regression, integration, system testing
- Review and analyze requirements, acceptance criteria, and technical specifications for testability
- Oversee the execution of test cases and ensure accurate documentation of test results
- Monitor test execution progress, identify defects, and ensure timely resolution
- Provide detailed test progress reports, defect metrics, and test summary reports to stakeholders
- Collaborate with development teams to understand the scope of testing and ensure alignment with project goals
- Continuously evaluate and improve testing processes, tools, and methodologies to enhance efficiency and effectiveness
- Ensure the readiness and maintenance of test environments, including the setup and configuration of test data and tools
- Provide training and support to team members on testing processes, tools, and techniques
- Ensure compliance with organizational standards, industry regulations, and best practices in software testing
- Maintain documentation and records to support audits and reviews

Software quality assurance engineer

Zakat, Tax and Customs Authority (Subcontractor)

10/2023 Riyadh

- Directed testing and validation efforts, resulting in a 15% enhancement in software reliability
- Developed and implemented test plans, identifying critical defects and ensuring timely resolutions
- Facilitated close collaboration with development teams, achieving a 20% reduction in development cycle times
- Delivered high-quality software products, surpassing user expectations and driving customer satisfaction
- Projects that I worked on:
 - CRM System
 - ZATCA Portal Revamp
 - Inspection System
